#Get Back Mass

BOSTON — The Baker-Polito Administration today launched a new public awareness effort to encourage residents to continue to stay safe and remain vigilant. The statewide campaign “Get Back Mass” highlights the critical steps everyone should take – wearing a mask and practicing good hygiene, keeping a safe distance, and getting tested – to protect themselves and their loved ones. The multilingual campaign will run on several platforms including television and digital ads.

The campaign features residents from across the Commonwealth who, in their own words, draw the connection between taking precautions so that they can “get back” to the activities, people, and experiences they enjoy – like attending live sporting events or concerts, throwing their child a birthday party, going out dancing with friends, or going on a “real” date. The campaign underscores the importance of taking precautions like wearing a mask so the Commonwealth can slow the spread of the virus and keep our communities safe while COVID-19 remains with us.

The Get Back Mass campaign launched with social media messages that highlight safety tips, digital animated videos in English, Spanish, Portuguese, Haitian Creole, Chinese (simplified and traditional) and Vietnamese, and information posters that will be displayed in convenience stores. Television advertisements in English and Spanish will run on broadcast and digital channels, continuing through February. All campaign components lead to a landing page, mass.gov/GetBack (/GetBack), which highlights the three key behaviors it takes to #GetBackMass:

- **Wear a mask.** Wear a mask or face covering in public to slow the spread of COVID-19.
- **Keep your distance.** No matter what, six feet or more is best. [Learn about ways to lower your risk when you are around others.](#) (/info-details/covid-19-prevention-and-treatment#social-distancing-)

- **Get tested.** [Find out when and where to get a COVID-19 test.](#) (/covid-19-testing)

The Get Back Mass campaign is the latest in a series of public awareness efforts the Commonwealth has taken to curb the spread of COVID-19, including the [September launch](#) (/news/baker-polito-administration-launches-additional-intervention-initiatives-for-communities-with) of [mass.gov/stopCOVID19](#) (/stopCOVID19) following the Administration’s establishment of the COVID-19 Enforcement and Intervention Team (CEIT), awareness for the [“Stop the Spread](#) (/news/baker-polito-administration-launches-targeted-free-covid-19-testing-sites)” testing initiative, and [#MaskUpMA](#) (/news/baker-polito-administration-launches-maskupma-reminding-residents-to-wear-face-coverings-to), a continuous campaign that reminds residents to wear face coverings to stop COVID-19 spread.

The Baker-Polito Administration also made other announcements related to efforts to battle COVID-19:

COVID-19 Community Grants: Today the Administration announced the awarding of \$650,000 in grant funding to community-based and faith-based organizations to help prevent and reduce the spread of COVID-19 among communities of color in the cities and towns hardest hit by COVID. The COVID-19 Community Grant Program was [previously announced](#)

(/news/baker-polito-administration-announces-new-grant-program-to-help-stop-the-spread-of-covid-19-in) by the Administration in September and supports non-profit, community-based and faith-based organizations in raising awareness of COVID best practices in marginalized communities across the commonwealth. Twenty organizations are receiving grant awards ranging from \$10,000 to \$50,000. Each receiving organization demonstrated deep engagement with their communities and understanding their needs, and a readiness to quickly implement their proposed projects. Awardees will engage in culturally appropriate community outreach, communication, and education, in the languages spoken in the communities they serve. Strategies include engaging youth peer leaders, trusted community leaders, and those with shared lived experience to increase the understanding of the impact of COVID 19 in their community. A full list of awardees is available below.

Abbot BinaxNOW Testing Program for Long-Term Care Facilities: Today the Administration also announced the expansion of the Abbott BinaxNOW testing program to include Massachusetts Long Term Care facilities. This expansion builds on last week’s [announcement of this program for K-12 schools](#) (/news/baker-polito-administration-announces-higher-education-holiday-travel-guidance-first-round-of). Under the program, Abbott BinaxNOW test kits can be used in Long Term Care facilities for the purpose of testing individuals entering the facility who are not regularly reporting staff. Those who test negative may be allowed to enter the LTC facility, provided, that they meet the screening criteria (e.g. are not exhibiting any COVID-19 like symptoms) and comply with other in-person visitation requirements such as wearing a mask and distancing.

Thursday’s COVID-19 Dashboards: The Department of Public Health’s Daily and Weekly COVID-19 Dashboards will not be published on Thanksgiving, Thursday, November 26. The Weekly Dashboard will be published on Wednesday, November 25, except for the city and town breakdown, which will be posted on Friday, November 27. Friday’s Daily Dashboard will include two days (11/26 and 11/27) of COVID-19 data.

COVID-19 Community Grant Awardees:

Organization Name, Location	Impacted Cities/Towns	Funding Amount
